List of Tables

Section 1

Introduction

The Appendix of the Wealth Topography section of the GC Wealth Project provides additional information on the calculation of wealth concepts included in the Wealth Topography and detailed source- and country-specific documentation. In particular, this appendix provides:

- the full conceptional grid used in the GC Wealth Project,
- the full list of sources included in the Wealth Topography,
- source-specific detailed information on raw data source, all source-specific composition tables reporting all composition rules used to obtain the wealth concepts, and additional tables on conceptual and manual mapping,
- country-specific tables reporting available sources, wealth concepts, and sectors for each country included in the Wealth Topography.

Section 2

Full Conceptual Grid

In the GC Wealth Project, we harmonize raw data from various sources using the a Conceptual Grid, or simply *the* grid. The grid is a table that assigns an alphanumeric identifier to each item or instrument of the balance sheet, and its construction of the grid is inspired by national accounting. The full grid is reported in Table ?? in Appendix. An extract of the grid, can be seen in Table ?. Under the column **Code**, we report the code that identifies each item of the balance sheet (e.g., **AN111** stands for **Dwellings**). The code consists of two elements (letters and numbers), and by a special character, only for the case of financial assets and liabilities. The alphabetic part of the code identifies whether a specific balance sheet component falls in the category of non-financial assets (**AN**), financial assets (**A_AF**) or liabilities (**L_AF**). Numbers, instead, identifies the class of assets and liabilities to which the instrument belongs.

Table 2.1: Full GC Wealth Topogragy Conceptual Grid

na_code	Description	Financial position
AN	Produced and non-produced non-financial assets	ga
AN1	Produced non-financial assets	ga
AN11	Fixed assets by type of assets	ga
AN111	Dwellings	ga
AN112	Other buildings and structures	ga

Section 3

Sources included in the Wealth Topography

All data sources included in the current version of the Wealth Topography are reported in Table???. The table reports the code associated to each source (**Source**), the name (**Name**), the account (**Account**), the source type (**Source type**), and the consultation date (**Download date**). All source included Wealth Topography can be distinguished according to types of national accounts:

- Balance Sheets contain holdings of non-financial assets (e.g., real estate assets or machinery), financial assets (e.g., deposits or equities), and liabilities (e.g., home mortgages) at a point in time.
- Financial Accounts contain holdings of financial assets (e.g., deposits or equities), and liabilities (e.g., home mortgages) at a point in time.

In other words, in the Wealth Topography, Financial Accounts are financial balance sheets in which only holdings of financial assets and liabilities are reported. In both cases, we report stocks or outstanding levels, that is holdings of assets and liabilities at the end of each accounting period (year) which reflect changes in transactions, nominal holding gains/losses, and other changes occurred throughout the year.
